

## Educational Role of Language Group's Call

### THEME

titles, components

### 'Language-Based Education'

Under this Call we intend to cooperate with ERL Partners on the recognition of specific means of basing entire educational systems upon language – both theoretical as well as practical. As language vary, so may possible implementations of the key ERL premises.

### AIMS

intended benefits

We hope to develop together recommendations and policies for educational decision-makers who understand the central position of language. Hopefully, the outcome of the cooperation in question will cover both ERL's 'Scope Major' as well as 'Scope Minor'.

### SUBSTANCE

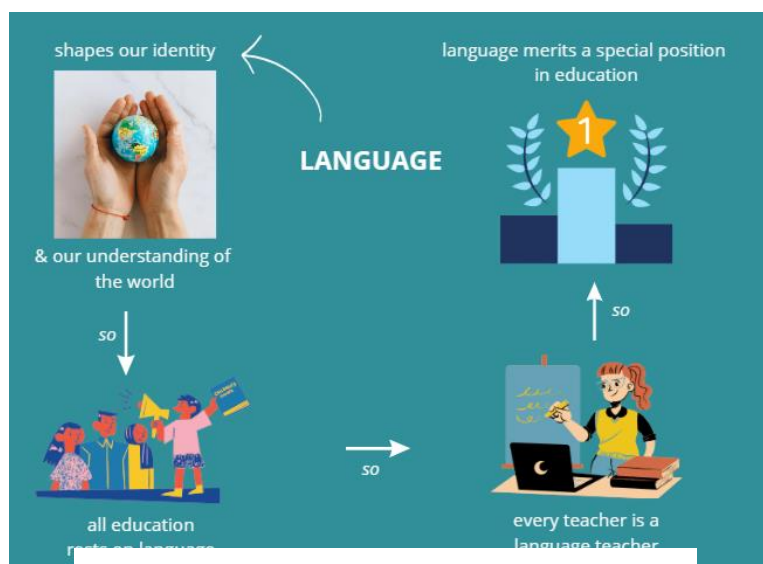

overall logic

We envisage cooperation between different entities and national representatives who observe multiple language-oriented educational solutions in their own countries and can share them with the others. Ideally, ERL Partners may form together an international ERL Centre running trainings, workshops, seminars etc. meant at the promotion of language-based education around the globe.

### TECHNICALITIES

dates, contacts

The Call has no closing date. It was initiated at the beginning of the year 2024 and remains open to any entities falling within ERL Paradigm. Do feel free to share this Call with any entities potentially interested in cooperation aimed at boosting the position of language. To join, please email us at [group@educationalroleoflanguage.org](mailto:group@educationalroleoflanguage.org)
